Class Participation / Cooperation Grading Rubric - 1st 2nd 3rd 4th Marking Period

Participation in class is more than physical presence. It means making a meaningful contribution to discussions and course activities. Satisfactory class participation and cooperation is defined as being present with all required class materials, answering questions, offering constructive opinions, and generally cooperating with the teacher and other students in the class. Those students who have difficulty in any of these areas should see me and we will work together to help you master these skills and contribute to the class.

To practice reflective thinking, you must take the risk of sharing your views and interpretations and receive feedback from others regarding the soundness of those views and interpretations. We construct knowledge and learn from each other, and if you don't speak, others don't learn from you [and vice versa]. The evaluation of your class participation is based on what can be demonstrated and observed in the classroom—you need to **SHOW WHAT YOU KNOW!**
